FIRST DRAFT · OCTOBER 2026

Roma Norte Building by Building

An inventory of the historic architecture of Colonia Roma Norte, Mexico City

Brian Gross

About this draft

This is a working inventory with one page per building: its address, the year it was built, the architect, the style, and how it has been used, from the first owners to today. It is a first pass and is meant to be corrected and filled in on the street.

It currently lists 285 buildings: houses, mansions, apartment buildings, privadas and a few commercial buildings. Churches are left out. Where a building has a prominent use today, such as a hotel, school, museum or restaurant, it is in the title line.

The colonia has well over a thousand buildings from 1900 to 1940, so this is the start of the list, not the end of it.

Sources

Santa María 2015: Rodolfo Santa María González, *Arquitectura del siglo XX en la Ciudad de México: la colonia Roma*, doctoral thesis, UNAM, 2015. Page numbers are the printed ones.

Tavares 2015: Edgar Tavares López, *Vivir en la Roma. Paisaje y testimonio de una colonia centenaria*, part 1, Universidad de Londres, 2015.

A few entries add public sources such as Wikipedia, the city tourism site and the press. These are listed on each page. The full SEDUVI/UAM catalogue of 2012, which the thesis cites, has not yet been consulted.

How much is filled in

Year of construction	134 of 285
Architect	101
Style	108
Current use	100
Photo	19

Santa María groups houses by type (casa tipo, casa entresolada, privada and so on) rather than by style, so many pages give the type and leave style blank. Grey text marks what is still missing. Photos come from Wikimedia Commons; most buildings have none there yet. A ✓ means a recent public source confirms the current use; other current uses come from the 2014–15 books.

Order

Entries run north to south by east–west street, starting at Avenida Chapultepec and ending on the north side of Coahuila. Within each street they run west to east. A building facing a north–south street is listed under

the east–west street at the north end of its block. The three plazas (Romita, Río de Janeiro and Luis Cabrera) have their own groups.

The boundary follows the official colonia, so Roma Norte I, the part west of Insurgentes up to Veracruz and Sonora, is included. The Roma grid is turned about 13° from true north, and "north" here means grid north.

Map links go to the building's address point. Where the number could not be matched exactly the link is marked approximate.

Built	1920 (S1; Wikipedia) / inaugurated 1929 (Chilango)
Architect	Ing. Gustavo Peñasco (S1); Wikipedia names Joaquín Baranda
Style	Eclectic: neomudéjar/Islamic polylobed arch, neocolonial details
Type (per source)	casa señorial de esquina, entresuelo y dos niveles, ecléctica neomudéjar/neocolonial; casa señorial neocolonial con arco polilobulado islámico; centro social

USES

Original	Single-family señorial corner residence (Casa Baranda-Luján)
Over time	Embassy of Brazil; from the 1930s Centro Asturiano de México (bowling, billiards, restaurant, auditorium) until 1985-86; UNAM from 1986 Embassy of Brazil from 1940; sold in 1945 to the Centro Asturiano, its seat for 40 years; leased to UNAM in 1986
Current	UNAM cultural centre and bookshop: book launches, exhibitions, literature and editing workshops (about 250 activities a year).

Source notes: Fue embajada de Brasil y luego (años treinta) Centro Asturiano; hoy Casa del Libro de la UNAM. Antigua embajada de Brasil, hoy Casa Universitaria del Libro (UNAM, en comodato); balcones de influencia de Tolsá sobre Puebla. Centro Asturiano (en Puebla y Orizaba). Food & Pleasure gives 1920-1925 and the 1940 Brazil lease; earlier sources differ on dates (see notes.md).

Sources disagree: Architect: S1 Gustavo Peñasco; Wikipedia Joaquín Baranda (probably the owner). Date: 1920 vs inaugurated 1929. Order of uses: S1 says embassy then Centro Asturiano (1930s); Mexico News Daily says Brazil leased it in the 1940s.

Built	c. 1908
Architect	Ing. R. A. (Regis A.) Pigeon; ground floor/interior remodelled by Francisco J. Serrano (1930s per S1; 1942 per Food & Pleasure)
Style	Eclectic: exposed red brick, French palatial vocabulary, mansard, conical corner turret; Art Deco ground floor
Type (per source)	edificio de departamentos de planta baja y cuatro niveles, tabique rojo aparente, estilo palaciego francés con torre; edificio ecléctico de departamentos de tabique rojo con mansarda y remate cónico; planta baja art déco (años treinta)

USES

Original	Apartment building (one of the first in the city with one flat per floor, for wealthy families)
Over time	Shops added in ground floor (1930s); decline and popular tenants; Spanish Republican exiles from 1936 (e.g., Indalecio Prieto, per testimony); bookshop and Kady ice-cream shop on ground floor; later middle/upper-middle class residents
Current	Residential apartments; ground floor restaurant Pigeon and Bar Las Brujas ✓

Source notes: Casa de las Brujas; planta baja modificada por Francisco J. Serrano (años treinta) con locales art déco; tuvo librería en planta baja. Casa o Castillo de las Brujas; según testimonio, reconstruido por dentro en 1936 con diez departamentos por piso; helados Kady en la planta baja.

Sources disagree: Remodel date: S1 places Serrano's remodel in the 1930s; Food & Pleasure says 1942. S2 testimony says the interior was rebuilt in 1936 with ten flats per floor.

Casa Newbold / former home of Álvaro Obregón

between Jalapa and Orizaba; block Colima / Tabasco · Google Maps

Built	early 20th c.
Architect	Remodel for hotel: Nahim Dagdug
Style	Porfirian, English brick facade
Type (per source)	English-style brick mansion

USES

Original	*Unknown*
Over time	Empty for a decade; residence of President Álvaro Obregón from 1920 to 1928; entertainment venue under his secretary Fernando Torreblanca; Cerrajería La Moderna locksmith from the mid 1960s; abandoned; hotel in the 21st century
Current	Luxury boutique hotel with restaurant, listed in the Michelin Guide; at the corner of Orizaba and Tabasco.

Source notes: Brick Hotel. Built for Sir William Newbold, director of the Banco de Londres y México, reportedly with bricks brought from England; bought by Álvaro Obregón in 1919 (never lived there; assassinated 1928); brothel in the 1930s-40s; locksmith shop La Moderna (Celso Álvarez) from the 1960s; abandoned; hotel opened 2001, reopened 14 Feb 2020. The name refers to the mustard-colored bricks said to have been shipped from England. The Obregón and Newbold story comes from press accounts based on the hotel's own history. Wikipedia's History of Colonia Roma instead says Obregón bought it in 1919 but was killed before living there, that it was a brothel in the 1930s and 1940s, and that the hotel opened in February 2020.

1. Conflicts between sources

- **RN-020 Oaxaca 31** — S1 caption pairs Oaxaca 31 with Tabasco, but OSM house numbers place Oaxaca 31 near Puebla/Sinaloa (numbers rise south-westward and Oaxaca 96 is at Colima); location here follows OSM.
- **RN-030 Parroquia de la Sagrada Familia** — S1 p.104 gives the address as Orizaba 27 and dates 1910-1912; S1 p.236, S2 and the tourism site give 1910-1925 and Puebla 144. Wikipedia gives first stone 1906 and most built 1910-1912.
- **RN-038 Casa Universitaria del Libro (UNAM) / antigua Casa Baranda-Luján** — Architect: S1 Gustavo Peñasco; Wikipedia Joaquín Baranda (probably the owner). Date: 1920 vs inaugurated 1929. Order of uses: S1 says embassy then Centro Asturiano (1930s); Mexico News Daily says Brazil leased it in the 1940s.
- **RN-103 Casa de las Brujas / Edificio Río de Janeiro** — Remodel date: S1 places Serrano's remodel in the 1930s; Food & Pleasure says 1942. S2 testimony says the interior was rebuilt in 1936 with ten flats per floor.
- **RN-199 El Parián** — Date: S1 caption 1920; S2 says designed by Ernesto Nieto and built in 1932; Mexico News Daily gives 1907.
- **RN-203 Casa Lamm (Centro de Cultura Casa Lamm)** — Architect: S1 credits Ing. Arturo Jiménez (1910); S2 (interview with C. Gómez Haro) and Wikipedia credit Lewis Lamm (1911).
- **RN-214 Instituto Renacimiento (antigua Casa Vogel)** — Original use and date: S1 says built 1910 for the Mercedarian sisters; Chilango says 1909 for the Vogel family; S2 says the nuns bought it from Coty Hernández Bravo. S1 p.106 places the Instituto at "Orizaba y Guanajuato".
- **RN-217 Edificio de Chihuahua 78** — Date: 1916 (INBA catalogue cited by S1), 1914 (S2), 1910 (María Eugenia Aragón, cited by S1).
- **RN-227 Casa de Zacatecas 120 (Universidad de la Comunicación)** — Date: S1 1914; S2 "década de los años veinte".
- **Instituto Renacimiento location:** S1 p.106 says 'Orizaba y Guanajuato'; S1 p.235, S2 and Chilango give Orizaba 126 at Chihuahua (the school later built a modern annex at Orizaba and Guanajuato, S2 p.184).
- **Sinagoga Rodfe Sedek dates (Roma Sur):** S1 p.104 says 1931; S1 p.239 says works 1930–1935; S2 p.170 says built 1929–1931.
- **Catedral Antioqueña de San Jorge (Roma Sur):** S1 p.104 gives 1942–1944; S1 p.245 gives 1943–1947.
- **Sagrada Familia address:** S1 p.104 'Orizaba 27' vs Puebla 144 (Mexico City tourism site).
- **Plaza Luis Cabrera / Roma Sur:** S2 p.67 notes that around 1913 the area south of Álvaro Obregón around plaza Ajusco was considered the 'colonia Roma Sur' extension; today it is in Roma Norte (south boundary Av. Coahuila).
- **Avenida Durango west of Insurgentes:** S2 p.52-53 says this stretch first belonged to the colonia Condesa and was considered part of the Roma from the late 1920s.

2. Possible duplicates (kept as separate entries)

- RN-082 Medellín 67: Possibly the same building as the corner house at Medellín y Colima (1919, Ing. José Espinosa; S1 p.149).
- RN-102 Plaza Río de Janeiro (corner with Durango): Distinct from the Casa de las Brujas, which stands on another corner of the same crossing (S1 p.149 vs pp.226-227); exact corner and number not given.
- RN-115 Colima 365: Possibly the same building as the corner house at Colima y Salamanca (S1 p.149).
- RN-116 Colima (corner with Salamanca): Possibly the same building as Colima 365 y Salamanca (S1 p.153); S1 lists them separately.
- RN-123 Medellín (corner with Colima): Possibly the same building as Medellín 67 (also 1919, Ing. José Espinosa; S1 p.139).
- RN-201 Álvaro Obregón (corner with Orizaba): Possibly the same as Álvaro Obregón 110 esquina Orizaba (S2 p.106); the other south corner is a 1946 apartment block (S2 p.115).

- RN-202 Álvaro Obregón 110: Possibly the same building as the 1919 corner apartment block by Mauricio Rivera Calatayud (S1 p.201).
- Córdoba 8 y Puebla (S1 p.149, 1921, Urdaneta y Corredor): S1's wording 'Puebla y Córdoba 8' may refer to two places (a corner at Puebla y Córdoba and Córdoba 8); OSM puts Córdoba 8 mid-block.
- Puebla 128 (Casa Azaar, S2) may be one of the four identical Stampa houses of Puebla 122-128 (S2 p.99); S1 lists Puebla 122-124 (1920, Stampa).
- The Casa Asúnsolo y López Negrete (family of Dolores del Río) at Puebla y Córdoba (S2 p.245) may be Córdoba 16 or Córdoba 8; not merged.

Notes on the boundary rules: Coahuila odd numbers (north side) = Roma Norte, even = Roma Sur; Av. Insurgentes Sur even 150–360 and odd 151–285 = Roma Norte (400s are Roma Sur/Hipódromo); Av. Chapultepec even (south side) and Av. Cuauhtémoc odd (west side) = Roma Norte. Streets such as Tlacotalpan, Campeche, Tehuantepec, Manzanillo, Nayarit, Tepic, Tuxpan, Aguascalientes, Tlaxcala, Iguala, Toluca, Torreón, Taxco, Quintana Roo, Puerto México, Salina Cruz, Tepeji, Coyutlán, León de los Aldama, Nogales, Bajío, Coatepec and Huatusco lie entirely south of Coahuila. Medellín, Monterrey, Jalapa, Tonalá and Córdoba continue into Roma Sur; their high numbers (e.g. Medellín 291, 362; Monterrey 359, 363; Jalapa 272, 295; Tonalá 315, 334; Córdoba 238) were classified by OSM numbering.

6. Gaps and caveats

- **Coverage.** Neither source is a full inventory. S1 analyses representative examples by typology (it draws on a 1991 inventory and the SEDUVI/UAM 2012 *Catálogo de inmuebles y elementos afectos al patrimonio cultural urbano, Roma Norte–Roma Sur*, neither of which is reproduced). S2 says the Roma keeps ‘más de mil inmuebles’ from the first four decades of the 20th century (pp.111, 236). The 250 entries here are therefore a starting set; the SEDUVI/UAM 2012 catalogue and INBA’s *Colonia Roma. Catálogo de inmuebles* (2001, cited by S1 p.226) are the obvious next sources.
- **Current use:** verified with a dated web source for 11 entries; the rest are ‘unverified’ or carry the 2014–15 use reported by the books.
- **Protection/catalogue status:** given for only a few entries (e.g. Córdoba 14 ‘not catalogued by INBA’ per S1; Edificio Ajusco ‘catalogued by INBA’ per a real-estate listing). All others: ‘not stated in sources’.
- **Style:** S1 classifies by typology, not style; 187 entries have no style stated. Do not infer one from the typology without a site visit or catalogue check.
- **Year missing:** 129 entries; **architect not identified:** 155 entries.
- **Location quality:** {‘exact’: 167, ‘Chapultepec parity’: 3, ‘interp’: 33, ‘corner’: 21, ‘Cuauhtémoc parity’: 1, ‘manual’: 4, ‘fallback-linear’: 10, ‘near’: 7, ‘Coahuila parity’: 4}. Entries marked ‘fallback-linear’ (Guanajuato 178 and 226, Querétaro 77 and 109, San Luis Potosí 12-16 and 154, Chihuahua 77 and 85-87, Córdoba 153, Sinaloa 5) were placed by extrapolating the street’s numbering because OSM has few house numbers on those streets; check their block and cross streets on the ground. ‘Corner’ entries with no number sit on the street intersection, so the specific corner is unknown.
- **Ranges and series** (e.g. Colima 11-17, Colima 224-234, Mérida 2-10, Valladolid 25-31, Tonalá 40-46, Orizaba 46-50) are kept as one entry per series as the sources treat them; the book may want one entry per house.
- **Oaxaca 31 y Tabasco** (S1 p.217 caption) conflicts with OSM numbering; see conflicts.
- **Spanish Wikipedia** (‘Colonia Roma’) could not be fetched in this session (permission prompt timed out); English Wikipedia articles were used instead.
- **Not yet added from public sources:** apart from Hotel Brick (Orizaba 95), Monterrey 122 (Burroughs) and the Casa Díaz-Peláez identification (Orizaba 131, old 139), no systematic web sweep for buildings missing from both books was completed. Candidates to research: other INBA-catalogued houses on Colima, Tonalá, Tabasco and Durango; the buildings around Plaza Villa de Madrid (Cibeles); Hotel Luma / Tribunal Superior Agrario (Orizaba, possibly no. 16); the Centro Asturiano history; galleries and restaurants in Porfirian houses on Colima and Córdoba.
